iddf how to change the start level in pikmin 2 I just got a new PSP the other day and really love it but I've ran into one problem. In my version of pikmin 2 the character tuner is a little...broken. Sometimes it is off and I have to go to a menu to set it up. And after using it for a while (lets see about 20 hours) It starts malfunctioning. I think maybe I accidentally uninstalled it or something? I know it is possible to set it up with a game card but I don't have any game cards. Would someone know how I could set it up manually? Like I said, I just bought the game yesterday and I only had about 20 hours with it so far. The game came with the Character Tuner and a game card. I don't think I'm missing anything but I'd like to know what it's called in english and how to access it manually. my ps3 did something similar and I found out that I needed a new game card to fix it. I hope you can figure it out with all your time and I wish you all the best with pikmin 2! like i said in my previous post that i just bought the game yesterday. when i first got it I had no problems at all and the tuner was perfect. I didn't have it that long before it went crazy on me. the tuner first started malfunctioning and then later on the screen would turn black for a few seconds and then turn back on. i finally had to go to a menu and do the character tuning. i hope this clears some stuff up. i'm not sure if i can upload a picture. i'll try to think of one.
